MONGODB DROP COLLECTION

The drop() Method

MongoDB's **db.collection.drop()** is used to drop a collection from the database.

Syntax:

Basic syntax of **drop()** command is as follows

```
db.COLLECTION_NAME.drop()
```

Example:

First, check the available collections into your database **mydb**

```
>use mydb
switched to db mydb
>show collections
mycol
mycollection
system.indexes
tutorialspoint
>
```

Now drop the collection with the name **mycollection**

```
>db.mycollection.drop()
true
>
```

Again check the list of collections into database

```
>show collections
mycol
system.indexes
tutorialspoint
>
```

drop() method will return true, if the selected collection is dropped successfully otherwise it will return false
